## European Directive

Dear Sir or Madam,

The substances contained in our products are - if they are subject to the REACH / CLP regulations - pre-registered or registered.

### RoHS and end-of-life vehicles

The Institute Fresenius has carried out analyzes on cadmium, mercury, Cr VI and lead in several samples. The values found are in the range of

Cd <0.0005%      Hg <0.00005%      Pb <0.0020%      Cr VI <0.0005%

The Cr VI determination is carried out photometrically by means of 1,5-diphenylcarbazite according to DIN 38045-D21 after carbonation.

The following substances are not used in our products or in our production process: polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE).

The substances listed in the SVHC list are not included in our products.

The delivered material is free of radioactive radiation, which goes beyond the natural own radiation. Radionuclide Co-60 <0.1 Bq / g

## Checked/Approved

by order of  
**Stahlwerk Bous GmbH**
